About Me

Hey there! I am Gaurav Joshi!

I am a Beginner Web Developer, passionate about learning new things every day related to programming. Currently having keen interest on making web pages and want to learn and study machine learning in future.

Skills

I have acquired my skills in HTML, CSS, Javascript, Bootstrap,

My Projects

Landing Page

I have created a landing page of a coaching center using HTML and CSS. The goal of this project is to create a visually appealing landing page. This landing page will serve as the main entry point for a website, providing essential information about the product or service and encouraging users to take specific actions such as signing up, purchasing, or learning more.

Calculator

This Calculator Web App is a user-friendly tool designed for quick and efficient mathematical calculations. Built with HTML, CSS, and JavaScript, it offers a sleek and intuitive interface, allowing users to perform basic arithmetic operations such as addition, subtraction, multiplication, and division.
